Please AMEND claims 14, 17, 20, and 23 and CANCEL claim 25 in accordance with the following:

1-13. (CANCELLED)

14. (CURRENTLY AMENDED) A point management system employing a computer for managing points issued to each customer who ~~receives a service according to~~redeems the issued points with an electronic information service, comprising:

a point issue means for issuing~~unit issues~~ points to a customer according to transactions a transaction performed by the customer;

a point accumulation means for calculating the issued points to accumulate the issued ~~points so as to get~~ unit updates cumulative issued points, and ~~decreasing~~ decreases the cumulative issued points ~~partially redeemed, on a time by time basis, with a time when~~ an ~~according to a time spent for providing the~~ electronic information service is provided which is ~~redeemed by the customer's request with the cumulative issued points~~ to a customer terminal; and

a service providing means for providing~~unit provides~~ at least any of video information, voice information, software information, music information and database information as the electronic information service to the customer terminal through a communication circuit; and

wherein the point accumulation ~~means~~ unit provides information for displaying the decreased customer's cumulative issued points on a screen of the customer terminal during the time the electronic information service is provided to the customer terminal.

15. (CANCELLED)

16. (CANCELLED)

17. (CURRENTLY AMENDED) A method of point management for managing points issued to each customer who ~~redeems~~receives service according to the issued points with an electronic information service, comprising:

issuing points to a customer according to ~~transactions~~ a transaction performed by the customer;

~~calculating the issued points to accumulate the issued points so as to get cumulative issued points, and decreasing the cumulative issued points decreasing the cumulative points partially redeemed, on a time by time basis, with a time when~~according to a time spent for providing an the electronic information service which is redeemed by the customer's request with the cumulative issued points is provided to a customer terminal; and

providing at least any of video information, voice information, software information, music information and database information as the electronic information service to a customer terminal through a communication circuit; and

providing information for displaying the decreased customer's cumulative issued points on a screen of the customer terminal during the time the electronic information service is provided to the customer terminal.

18. (CANCELLED)

19. (CANCELLED)

20. (CURRENTLY AMENDED) A point management apparatus for managing points issued to each customer who ~~redeems~~receives service according to the issued points with an electronic information service, comprising:

a point issue unit ~~for issuing~~issues points to a customer according to a transaction ~~transactions~~ performed by the customer;

a point accumulation unit ~~for calculating~~updates the issued points to ~~accumulate the issued points so as to get cumulative issued points, and decreasing~~ decreases the cumulative issued points ~~partially redeemed, on a time by time basis, with a time when~~according to a time spent for providing an the electronic information service which is redeemed by the customer's request with the cumulative issued points is provided to a customer terminal; and

a service providing unit ~~for providing~~ provides at least any of video information, voice information, software information, music information and database information as the electronic

information service to a customer terminal through a communication circuit; and;

wherein the point accumulation unit provides information for displaying the decreased customer's cumulative issued points on a screen of the customer terminal during the time the electronic information service is provided to the customer terminal.

21. (CANCELLED)

22. (CANCELLED)

23. (CURRENTLY AMENDED) A computer readable medium having a program stored therein to cause a point management system to execute operations, said operations comprising:

issuing points to a customer according to ~~transactions~~ a transaction performed by the customer;

~~calculating the issued points to accumulate the issued points so as to get cumulative issued points, and decreasing the cumulative issued points partially redeemed, on a time-by-time basis, with a time when an~~ according to a time spent for providing the electronic information service which is redeemed by the customer's request with the cumulative issued points is ~~provided to a customer terminal; and~~

providing at least any of video information, voice information, software information, music information and database information as the electronic information service to a customer terminal through a communication circuit; and

providing information for displaying the decreased customer's cumulative issued points on a screen of the customer terminal during the time the electronic information service is provided to the customer terminal.

24. (CANCELLED)

25. (CANCELLED)
